

Knit without Boundaries (織物・創無限)

The Visual Arts department joined the program “Knit without Boundaries” organized by the Poly University Design and Maker Faire. The program aimed at introducing knitting technology to school students by engaging them in understanding technology, craft making and knitting demonstrations and practices. The activities enhanced our students understanding of fashion history in Hong Kong. ASD visual arts students have knitted a long scarf piece for the Maker Faire exhibition at Poly University in March 2017. Our students and teacher representatives joined the Mother’s Day activity with the elderly for the event.
