

## **Life Planning with Entrepreneurial Spirit**

This year, the Life and Career Planning Team have co-operated with CoCoon Foundation to provide students with training in an entrepreneurship program designed to enable S.5 students to gain access into the entrepreneurship community.

It began with Entrepreneur Sharing from Ms. Serena Pau from Groking Lab. Her main message was that, “entrepreneurship is the pursuit of opportunity beyond resources controlled.” This was followed by a 3-hour workshop for students on how to use design thinking by asking what is, what if, what wows, and what works to redesign products for young office workers.

The program also included job shadowing, a corporate challenge, various workshops and internships for those students who are interested in entrepreneurship. Our students recorded outstanding performances in different types of activities. We believe that our students have been inspired by entrepreneurs to work inside start-ups and acquire an entrepreneurial mind and skillset.
