

Through Our Eyes Photography Education Programme: Mobile Photography Exhibition

Every year, Through Our Eyes sets a theme for the exhibition of the photography education programme. “Folding / Unfolding” is the theme of the latest edition. 14 Artist Educators designed and led different kinds of courses including workshops for 18 participating secondary schools, TOE Advanced Courses and workshops collaborating with other organisations. Young people are encouraged to pay attention to their relationship with the surroundings, to understand and observe the world, to examine and deepen their feelings and thoughts, which were then represented and articulated by a combination of photography and other artistic media.

The two-month-long exhibition will tour to different locations and engage the audience and the community through various activities, such as display of collection, students’ sharing, courses and seminars of different kinds, etc. **Our students are going to be one of the representatives in the student sharing on 2nd July 2017(Sun), 15:00-17:30. Please come and join the discussion, as well as sharing the artwork.**
