

Mathematics Department (School-based Support Service organized by EDB)

With a view to enhancing students' learning interest in Mathematics through STEAM education, the Mathematics Department participated in the School-based Support Service organised by the Education Bureau (EDB). We Mathematics teachers prepared an S2 STEAM project in collaboration with EDB. All of us were honoured to host a sharing session as guest speakers in the Mathematics Education Support Services Year-end Sharing Session (2019/20).
